

# DS-5000

Records, edits, overwrites, plays  
and boosts your productivity.

Features to help you  
work better than ever.

Doesn't that sound great?

Join the digital  
revolution. Pick up  
the DS-5000.

Presenting the Olympus DS-5000 — a voice dictation system designed to take full advantage of all the ease and convenience of digital technology. This next-generation voice recorder is lightweight, yet durable enough to endure years of professional use and abuse. You'll find so many features that make using the DS-5000 a pleasure to operate: a bright, read-at-a-glance screen, customizable commands to help you work better and the ability to effortlessly find and manage dozens of files. It's everything you need to boost your productivity.

Security at the  
touch of your finger.

Protect your work. The DS-5000 is equipped with the latest in file encryption/decryption and features password protection to lock/unlock the recorder. The DS-5000iD model has a biometric fingerprint reader for more advanced security.

actual size

A switch that works just like analog. Only better.

Digital sound with stunning clarity.

In 1969, Olympus introduced the first handheld voice recorder. Since then, we've been busy perfecting the technology. The DS-5000's new slide switch is more responsive and durable than ever. It's also more comfortable, thanks to a larger thumb rest. Equally important, you'll always get a complete dictation. No clipped or dropped words.

The DS-5000 provides enhanced fidelity with the new DSS Pro format and our Quality Play (QP) mode. It provides a stunning 16kHz sampling rate so you'll hear every word with unmatched clarity. The result? Transcription will be more accurate and efficient. A Smooth Cue/Review feature lets you hear playback without garbled sound, helping transcriptionists work at their own pace.

It does so much yet weighs so little.

**FUNCTION BUTTONS**  
Customize your recorder. Create command shortcuts to help you work more efficiently.

**LARGE LCD**  
Backlit and big. Read at a glance.

**SPEAKER**  
Clear, crisp playback that's not obstructed by your hand.

**USB 2.0 CONNECTOR**  
Allows high-speed file downloading and uploading. Send files without docking.

**MICROPHONE**  
Switch microphone sensitivities to meet recording needs.

**NEW BUTTON**  
Conveniently located next to slide switch. Press one button to start a new file. Can't be accidentally activated.

**CENTRALIZED NAVIGATION BUTTONS**  
Effortlessly navigate all commands.

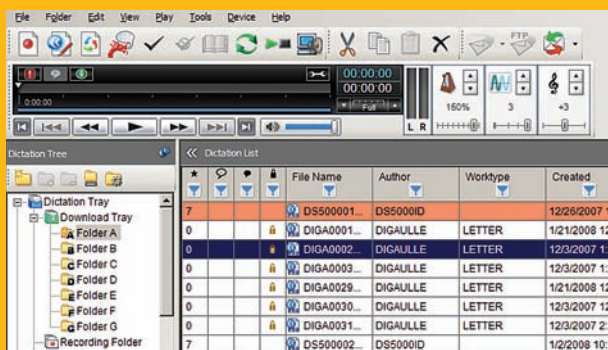

**SLIDE SWITCH**  
Amazingly durable. Promotes easy operation. Extra-large size for greater comfort.

# Voice productivity starts with smart software.

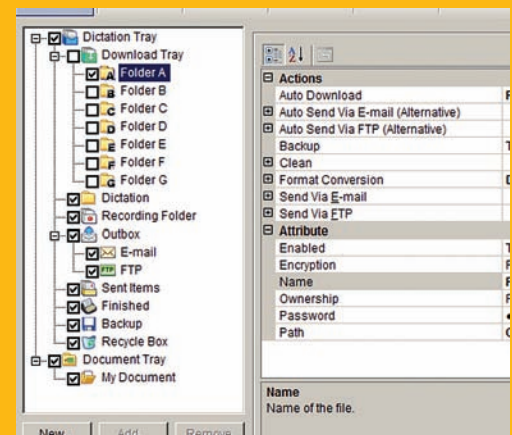

## Taking a whole new look at how you work.

In this case, looks are important. The DSS Player Pro software has a clean, functional design that helps you work smarter. The toolbar is fully customizable. A new search function lets you quickly find files. There's also a new Dictation Properties view and Preview window.

## Take greater control over your workflow.

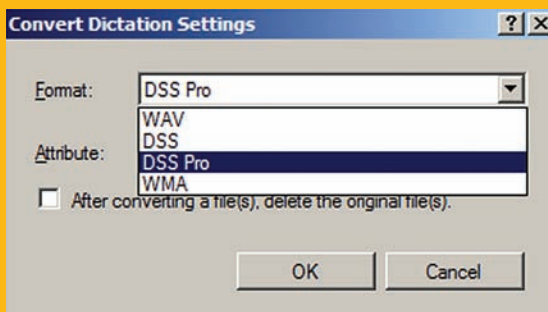

Move and manage files with ease. The software allows you to retrieve typed documents, distribute files via e-mail/FTP and encrypt/decrypt dictations — all automatically. You also have the freedom to upload files from anywhere so work always keeps moving.

The revamped, rethought DSS Player Pro software was designed to do one thing really well: help you work more efficiently. The system is more customizable than ever to match the way you work. Operation is more intuitive. File management is effortless. And security has been enhanced. It even manages its own software and firmware updates. This is truly where voice productivity begins.

## Supports a variety of audio formats.

The DSS Player Pro software is compatible with an extended list of audio formats including DSS, DS2, WMA, WAV and MP3. You can also import recordings from other sources — both analog and digital — into the software to make transcriptions.

## Helping to make transcription a lot easier.

Every transcriptionist is different. That's why you can personalize our software to work the way you do. Nearly everything can be customized to your preferences. Workflow is also easier. You can forward dictations to other locations and the software notifies you with a pop-up window when a new dictation has arrived.

## DURABLE BATTERY DOOR

Only opens when you want it to.

# The leading voice in the dictation industry.

**Capture It All.™**

What does it take to be a market leader? Products that change the way an entire industry works? A long history of responding to people's needs? A track record of setting high standards for performance? If that's the criteria, then Olympus is in front of everyone. The DS-5000 voice recorder and software package is just another example of our dedication to designing products that continually improve voice productivity.
