

Philips SpeechMike  
**USB dictation  
microphone**  
with SpeechExec  
workflow software

**SPEECHMIKE**

**LFH3200/3300 series**

## Boost your productivity

with a professional dictation solution

The professional SpeechMike USB microphone takes stationary dictation to a new level. It delivers excellent speech recognition capabilities, an antimicrobial surface for improved hygiene, and refined ergonomics for easy operation.

### Superior audio quality

- Noise-canceling microphone for accurate speech recognition results
- Integrated sound card and speaker ensuring crystal clear playback

### Enhance your productivity

- Comfortable ergonomic design for one-thumb operation
- Antimicrobial surface for active bacteria reduction and improved hygiene
- Attach client or patient data to a recording simply by scanning a barcode

### Designed for professionals

- Available with Philips SpeechExec professional dictation software
- Geared for Dragon NaturallySpeaking speech recognition software
- Can be fully integrated into existing workflow systems

**PHILIPS**  
sense and simplicity

# Highlights

## Noise-canceling microphone

The advanced microphone design and an optimized frequency response rate cater for the best speech recognition results.

## Crystal clear playback

The advanced built-in front speaker and the integrated sound card guarantee crystal clear playback of your dictation files.

## Ergonomic zone design

Designed with three ergonomic zones, it has been tested and proven by users to have the most comfortable fit in the human hand. The dictation zone is optimized to keep thumb movement to a minimum and allows for blind operation. The buttons needed for the actual dictation functions take up the greatest amount of space in the central area of the device. Less frequently needed function buttons are clearly arranged above and below. The trackball uses a laser sensor that allows precise cursor movements. It contains an integrated confirmation button for simple control of PC functions and can also be used to control playback volume.

## Antimicrobial surface

The antimicrobial surface is important for use in a clinical environment. This feature was achieved by adding a substance to the plastic that impedes the reproduction of microorganisms, thus improving hygiene.

## Integrated bar code scanner

Link client or patient data to a recorded file simply by scanning a bar code. The scanned information is automatically attached to the dictation file, streamlining the documentation process. All identifying information is entered accurately, increasing security and potential for cost savings.

## SpeechExec Pro dictation software

The dictation management software SpeechExec Pro Dictate allows the seamless and flexible integration of dictation, transcription, and voice recognition in a single application. Dictation files and documents can be sent via network or email, uploaded to an FTP server, or archived in the company network - even in encrypted form. User-friendly functions allow for clear and transparent organization of the recordings and the implementation of an efficient document workflow.

## Geared for speech recognition

The SpeechMike features preconfigured buttons for direct control of Dragon NaturallySpeaking, the voice recognition solution from Nuance.

## Ready for integration

Philips provides a software development kit (SDK) for speech, office, and business application developers that allows for convenient programming of interfaces when integrating the SpeechMike into professional information and dictation solutions.

# Specifications

## Connectivity

- USB: High-speed USB 2.0

## Audio recording

- Microphone type: electret condenser microphone
- Microphone capsule: 10 mm
- Characteristic: uni-directional
- Frequency response: 200 – 10 000 Hz
- Sensitivity: 85 dB – 104 dB (depending on position of mic-slider in sound control panel)
- Signal-to-noise ratio: > 70 dBA

## Sound

- Speaker type: built-in round, dynamic speaker
- Speaker diameter: 30 mm
- Acoustic frequency response: 300 – 7500 Hz
- Speaker output power: > 200 mW

## Barcode scanner (LFH3300/3010)

- Compatible bar codes: EAN, UPC, Code 11/39/93/128, Codabar, MSI Code, RSS, Interleaved 2 of 5, Discrete 2 of 5
- Laser class: class 1 laser product

## System requirements

- Processor: Pentium IV 1 GHz recommended
- RAM memory: 1 GB (2 GB recommended)
- Hard disk space: 100 MB for SpeechExec, 850 MB for Microsoft .NET 4, 30 MB for Speech Control. 250 MB for Microsoft .NET 2.0
- Operating system: Windows 7 (32/64-bit), Windows Vista (32/64-bit), Windows XP (32 bit)
- Free USB port
- DVD-ROM drive
- Graphics card: DirectX-compliant graphics card with hardware acceleration recommended
- Sound device: Windows-compatible sound device

## Green specifications

- Compliant to 2002/95/EC (RoHS)
- Lead-free soldered product

## Operation conditions

- Temperature: 5° – 45° C / 41° – 113° F
- Humidity: 10 % – 90 %

## Dimensions

- Product dimensions (W × D × H): 45 × 165 × 30 mm / 1.8 × 6.5 × 1.2 inch
- Weight: ca. 0.160 kg / 0.353 lb
- Cable length: 3 m / 10 ft

## Design and finishing

- Material: antimicrobial housing
- Color(s): warm grey/black

## Package contents

- SpeechMike USB dictation microphone

## Available versions

### Push-button operation

- LFH3205 with SpeechExec workflow software
- LFH3200 without SpeechExec workflow software

### 4-position slide switch (record, stop, play, fast rewind)

- LFH3215 with SpeechExec workflow software
- LFH3210 without SpeechExec workflow software

### Configurable 4-position slide switch (fast forward, play/record, stop, fast rewind)

- LFH3225 with SpeechExec workflow software
- LFH3220 without SpeechExec workflow software

### Bar code scanner

- LFH3300 with push-button operation, without SpeechExec workflow software
- LFH3310 with 4-position slide switch, without SpeechExec workflow software
